Capability Statement

Data · Analytics · Digital Delivery

COMPANY OVERVIEW

The Dunleavy Organization, LLC is a South Carolina small business providing data engineering, analytics and reporting, and digital delivery services for commercial and public-sector customers. Core capabilities include data pipeline development and modernization, SQL-based data platforms, business intelligence and dashboard delivery (including Microsoft Fabric and Power BI), custom web application development, website and digital platform implementation, and systems integration. The firm delivers end-to-end solutions from requirements definition through deployment and documentation, supporting organizations that need reliable data, clear reporting, and working digital systems.

CORE COMPETENCIES

- Data pipeline development, ETL/ELT, and data modernization
- Business intelligence and dashboards (Power BI, Microsoft Fabric)
- Website and digital platform implementation
- Open-data analytics products and public-facing data applications
- SQL data platforms and reporting foundations
- Custom web application design, build, and deployment
- Systems integration and operational digital tools
- End-to-end delivery with documentation and handover

PAST PERFORMANCE

Shepherd's Field Foundation Client / Partner

Website design and delivery for nonprofit foundation online presence.

SubOnSite Commercial Partnership

Residential construction field-presence platform: sub-lead check-in, jobsite dashboards, and live product deployment for owners and project managers.

Climate Record Platform Commercial Product

Nationwide climate data warehouse and analytics product (NOAA GHCNd) with automated refresh pipeline and public-facing analytics.

Cost of Living Reality Check Commercial Product

Multi-source data preparation, ETL-style processing, and interactive web delivery for cost-of-living analysis.

Market Intelligence / Stock Analytics Commercial Product

Data pipeline and public dashboard delivery for market intelligence and stock analytics (cloud BI and web presentation).

SinglePlayerGamers Commercial Product

Multi-user product web application including authentication, application data, email operations, and production hosting.

Medicare Part D Specialty Analytics Open-Data Analytics

CMS open-data analytics case study: specialty cost economics, warehouse/BI path, and published Tableau Public dashboard.

DIFFERENTIATORS

- End-to-end ownership from requirements through production deployment and documentation
- Combined data platform, analytics, and application delivery in one firm
- Public, demonstrable portfolio products and live systems—not slideware only
- Founder-led scoping with clear commitments and practical outcomes
- Microsoft Fabric Data Engineer Associate (DP-700); Certified Scrum Product Owner (CSPO)
